

## 31/05/2012 EARTHQUAKE UPDATE

Written by JardaKo

Thursday, 31 May 2012 20:02 - Last Updated Monday, 04 June 2012 19:45

---

The area around VM was hit by two earthquakes on the 20th and 29th of May. The VM plant has reported only minor damage. The first inspection conducted on May 30th confirmed that the damage will not prevent the restart of the production and our other business activities. Work is underway to ensure the full functionality of the facilities. Further verification to ensure the safety of the various departments will be conducted with the support of the local authorities and will be completed by tomorrow. Initial reports from our local suppliers confirm that the situation is under control.
